

# UNINSURED UNITED PARACHUTE TECHNOLOGIES, LLC.

## ALTERNATIVE MAIN CONTAINER CLOSING TIP

UPT now suggests an alternative method to closing the Vector 3 main container. As shown below, this alternative method eliminates the possibility of a pin lock to the bridle. This method is also shown in section 4, page 68 of the current Vector 3 Owner's Manual.

The bridle may be routed out the bottom right as shown here.

Cover the unused hook Velcro with pile Velcro or remove it from the center flap.

The remaining bridle is then stowed as shown.  
Continue closing and folding the pilot chute as instructed in section 4 of the current Vector 3 Manual.
